Phone: 785-75-3297

www.bainterboomtrenchers.com

The Bainter Boom Trencher is a versatile Skid-Steer Attachment suitable for many different applications. The feature you will first notice is the forward digging capability. The Bainter Boom Trencher is the only trencher on the market with this patented feature. Our rugged all steel construction provides for a uniquely durable machine weighing in at twice the weight of our competitors. Trenching depth can easily be changed to dig deeper or shallower as needed for your application. Width extensions for the chain allow digging out to 12" wide for footing work. The Bainter Boom Trencher is the Skid-steer attachment that you have been waiting for.

Additional options are our backfill blades and 3 point hitch conversion kit. Now you can use your Bainter Boom Trencher on tractors with category 1 or 2 three point hitches. You simply attach the conversion brackets and replace the third arm with a hydraulic cylinder. Now you can use the Bainter Boom Trencher even if you do not have a skid steer. Our new backfill blades allow you to easily refill your trenches, simply attach the backfill blades to you boom and make a second pass along the trench with your machine.

BAINTER BOOM TRENCHERS: BASE MODELS

prices as of Oct 1st 2011

2' 6" Machine
Digging Depth 2' 6"
Trench Width 5"
12" Short Augers
Wheel Kit
Crummer/Spoon
4000 PSI Hose Kit
FOB Cost \$6,950.00

3' 6" Machine
Digging Depth 3' 6"
Trench Width 5"
12" Short Augers
Wheel Kit
Crummer/Spoon
4000 PSI Hose Kit
FOB Cost \$7,250.00

4' 6" Machine
Digging Depth 4' 6"
Trench Width 5"
12" Short Augers
Wheel Kit
Crummer/Spoon
4000 PSI Hose Kit
1' Extension kit
